

Seminar Report on "Remote Sensing: A Method of Collection of Geographical Data"

On April 6, 2023, a seminar on research methodology titled "Remote Sensing: A Method of Collection of Geographical Data" was conducted at Government General Degree College, Lalgarh, Jhargram-721516. The event was held from 2:00 PM to 3:00 PM and was organized by the Department of Geography.

The seminar was led by Dr. Swapan Kumar Maity, Assistant Professor of Geography at Nayagram P R M Government College, Baligeria, Jhargram-721125. With his expertise in the field of geographic research, Dr. Maity provided an insightful overview of remote sensing, a critical method for collecting geographical data, and its applications in modern geographical studies.

During the session, Dr. Maity explained the principles of remote sensing, focusing on how data is gathered from satellites and other high-altitude platforms to analyze the Earth's surface. He highlighted the advantages of this technique in collecting large-scale geographical data, which is essential for mapping, environmental monitoring, land use analysis, and disaster management. The seminar also covered the technological advancements in remote sensing and its increasing importance in various fields, including urban planning, agriculture, and climate change studies.

Dr. Maity provided real-world examples of remote sensing applications and discussed the different types of sensors used for gathering data. He emphasized the significance of accurate data interpretation and its potential to enhance research quality in geography and allied disciplines.

The seminar concluded with an interactive session, where students and faculty members actively participated. Students' attendance was 12.

The event ended with a vote of thanks to Dr. Swapan Kumar Maity for his informative and engaging presentation, which provided attendees with a deeper understanding of remote sensing as a powerful tool for geographical data collection. The seminar proved to be an enriching experience for all participants, contributing to their knowledge of advanced research techniques in geography.
