### **Green Campus Initiatives:**

The teachers and students of Government General Degree College, Lalgarh are inspired to adopt various measure as part of our commitment to a green campus. The college is situated exactly on the bank of Kangsabati River where the vast area surrounding the campus looks like a green valley. Beside this, the institution has cultivated green habits by planting trees in the entire campus.

We have taken significant strides toward becoming a plastic-free institution. Various posters and informational materials have been strategically placed across the campus, educating students and staff about the adverse impact of plastic on the environment. The campus is strictly maintained as a 'No Smoking Zone'. The specific part of the institution is strictly restricted the entry of any kind of vehicles and automobiles, which are marked as 'No Vehicles Zone,' 'No Parking Zone'. All the faculty and students have the good habit to use the dustbin for degradable and non-degradable waste.

The NSS unit of the College consistently engages in campus cleaning and beautification. They collect waste materials and ensure a clean environment. Around 30 dedicated volunteers actively participated in the event. Furthermore, they organized an impactful drug and tobacco prevention awareness program, involving approximately 30 volunteers. These volunteers visited nearby villages, impressing the local community with their valuable services.

The department of Botany takes various initiatives to concern about the bio-diversity and sustainable environment. They have organized different seminar/webinars and observe days to contribute towards environment and green initiatives.
