3. *Clean and green campus initiatives*

4. *Beyond the campus environmental promotion and sustainability activities*

Clean and Green Campus Initiatives:

The teachers and students of Government General Degree College, Lalgarh are inspired to adopt various measure as part of our commitment to a clean and green campus. The college is situated exactly on the bank of Kangsabati River where the vast area surrounding the campus looks like a green valley. Beside this, the institution has cultivated green habits by planting trees in the entire campus.

We have taken significant strides toward becoming a plastic-free institution. Various posters and informational materials have been strategically placed across the campus, educating students and staff about the adverse impact of plastic on the environment. The campus is strictly maintained as a ‘No Smoking Zone’. The specific part of the institution is strictly restricted the entry of any kind of vehicles and automobiles, which are marked as ‘No Vehicles Zone,’ ‘No Parking Zone’. All the faculty and students have the good habit to use the dustbin for degradable and non-degradable waste.

The NSS unit of the College consistently engages in campus cleaning and beautification. They collect waste materials and ensure a clean environment. Around 30 dedicated volunteers actively participated in the event. Furthermore, they organized an impactful drug and tobacco prevention awareness program, involving approximately 30 volunteers. These volunteers visited nearby villages, impressing the local community with their valuable services.

Beyond the campus environmental promotion and sustainability activities

The NSS unit of the College works diligently to promote environmental awareness and sustainability beyond the campus. Additionally, they arranged special awareness on prohibition of tobacco and drug and Dengue protection at nearby villages.

We actively encourage the use of eco-friendly alternatives and have implemented a “Take pride in entering a plastic-free campus” campaign to reduce single-use plastic consumption. Furthermore, our focus on tree plantation remains steadfast, with regular tree-planting drives enhancing the greenery of our campus.

As a cornerstone of our commitment to cleanliness and hygiene, regular sanitization practices are rigorously upheld beyond our college premises.

In the wake of the COVID-19 pandemic, these efforts have taken on added significance, with a heightened focus on high-touch surfaces and frequently used spaces. The college community remains proactive in implementing recommended sanitization protocols, including the use of approved disinfectants and adherence to established cleaning schedules.

These endeavors combined with conscientious waste management and recycling initiatives, fortify our vision of a sustainable and environmentally responsible campus for generations to come.
